

Supplier Information Report

Know Who Your Suppliers Are

Qualify Suppliers Quickly Based on Business Profiles

How well do you know each of your suppliers? Do they offer the right products and services? Is their financial stability changing? These are critical questions that procurement professionals must answer every day. And with changing market and supplier dynamics, understanding exactly where the risk is located – and who is at risk – is becoming more and more challenging.

D&B's Supplier Information Report helps you quickly assess your existing or potential suppliers by providing you with a complete overview of the nature and performance of their business. This comprehensive report gives you the information you need to understand your suppliers and monitor their risk. Best of all, you can eliminate the weeks it can take compiling and analyzing information by accessing the Supplier Information Report online. This can significantly reduce the time spent in the Request for Information (RFI) process, allowing more time for you to negotiate and generate contracts.

Key Benefits

- Access high quality, actionable supplier information
- Quickly locate and evaluate suppliers based on their products and services or financial stability
- Evaluate if any critical suppliers are at risk of going out of business
- Understand who is at risk so you can put corrective actions in place
- Confirm if any of your suppliers are on any debarment list or involved in fraudulent, bribery or money laundering activities

Quality Information = Profitable Decisions

At D&B we are committed to providing our customers with the highest-quality data available. To do this, we take our data through a process we call DUNSRight™ in which we collect and aggregate data from thousands of sources daily so our customers have confidence that they can use the information to make profitable decisions. The foundation of DUNSRight is Quality Assurance, which includes over 2,000 separate automated checks, plus many manual ones, to ensure the data meets our high-quality standards. The process works like this:

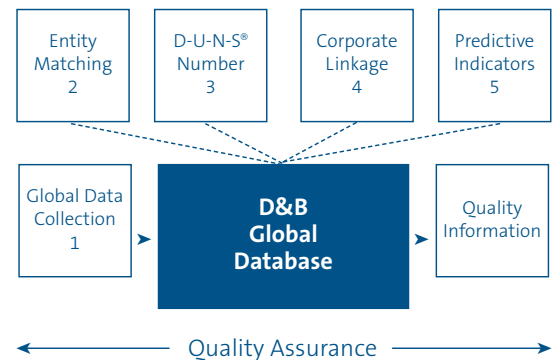

Global Data Collection: Our data collection expertise and our commitment to quality information is demonstrated by our one million database updates daily, which enable you to identify risk associated with new and existing suppliers.

Entity Matching: Our patented matching process quickly identifies if unrelated entities are, in fact, the same company and whether they have a history of risk or fraud.

D-U-N-S® Number: Our unique identifier tracks business change so you can be alerted to suits, judgments, liens, or bankruptcies that can potentially disrupt your supply chain.

Corporate Linkage: Our unparalleled global linkage capabilities uncover your total risk exposure across an entire corporate family.

Predictive Indicators: Our most powerful predictive indicators in the industry help you identify and manage your risk exposure at a supplier or supplier portfolio level.

Mitigate Risk

Report Components

Business Overview

Details your supplier's legal structure, years in business, size, Supplier Evaluation Risk Rating and diversity status to help you assess the overall business condition.

History and Operations

Details the background of the business and its management team. This includes business structure, affiliate relationships, global activity and recent events.

Products and Services

Details the line of business and primary industry and commodity offerings by standardized codes. We also provide insight into cross-market opportunities.

Financial Condition

Details the supplier's financial condition based on balance and historical financial statements when available. We provide an at-a-glance risk score for comparison purposes.

Public Filings

Details any pending, current or documented suits, judgments, and/or liens against the supplier. We also show you UCC filings and government activity, such as whether they are a contractor, have been debarred or what congressional district they belong to.

Quality Information on Over 100 Million Businesses Around the Globe

With over a million updates daily to our global database, you can be assured of the highest quality information on your existing or potential suppliers.

Enabling Confident Business Decisions

Before you spend time pursuing a new supplier or assessing an existing supplier, know their business. Answers are only a click away:

- Is this a stable company?
- Will it be in business in the next 6 months?
- Has it shown growth over the past several years?
- Does this company have a strong and experienced management team?
- Does this company have the locations and infrastructure to support my business?
- How dependent will this company be on my business?
- Is this company involved in fraudulent activities?
- Are there significant changes in this company's business operation I should know about?
- Are there any suits, liens or judgments filed against this company?
- Does this company have diversity status?
